Fujitsu ESPRIMO P7936 E85+ Desktop PC

The expandable business workhorse

ESPRIMO P7936 E85+

The ESPRIMO P7936 E85+ equipped with state-of-the-art Intel® chip and processor technology is the ideal partner for all your demanding business applications. Produced with specially selected material and equipped with comprehensive powersave options, such as up to 87% efficient power supply and energy-saving management, the ESPRIMO microtower PC today already meets the environment requirements of tomorrow and cuts your energy costs. With extended system management functions, intelligent hardware design, extensive tests and a lifecycle of up to 18 months, the high performance levels of this PC meet every requirement.

Microtower

Maximum performance and optimal extendability

■ Top-quality, high-value microtower, 6 drive bays, 4 PCI/PCI express interfaces

Environmentally compatible product

Your contribution to environmental protection for the continued existence of our planet

■ Halogen-free mainboard, sophisticated product concept for the entire lifecycle

Silent operation

Pleasant working environment due to an extremely quiet system

■ Innovative hardware design, optimized fan concept

System management

Easy system administration for complex IT infrastructure

Intel® vPro™ technology

Energy saving

Low power consumption and low costs, without any loss in performance.

Low energy-consuming processors, up to 87% efficient power supply and enhanced power management settings
